

CHECK VALVE TYPE UZZR

**WK
450 433**

Size 6 to 25

up to 32 MPa

04.1999r.

Check valves type UZZR provide leakage-free closure of hydraulic fluid flow in one direction and allow free flow in the opposite direction. Check valves type UZZR are designed for in-line mounting in any position.

DESCRIPTION OF OPERATION

Fluid flowing through the valve overcomes the resistance of the spring 3 and causes the poppet 2 to lift. This allows free flow.

In the opposite direction the spring 3 and the fluid push the poppet 2 onto the seat in the housing 1 and close the connection.

TECHNICAL DATA

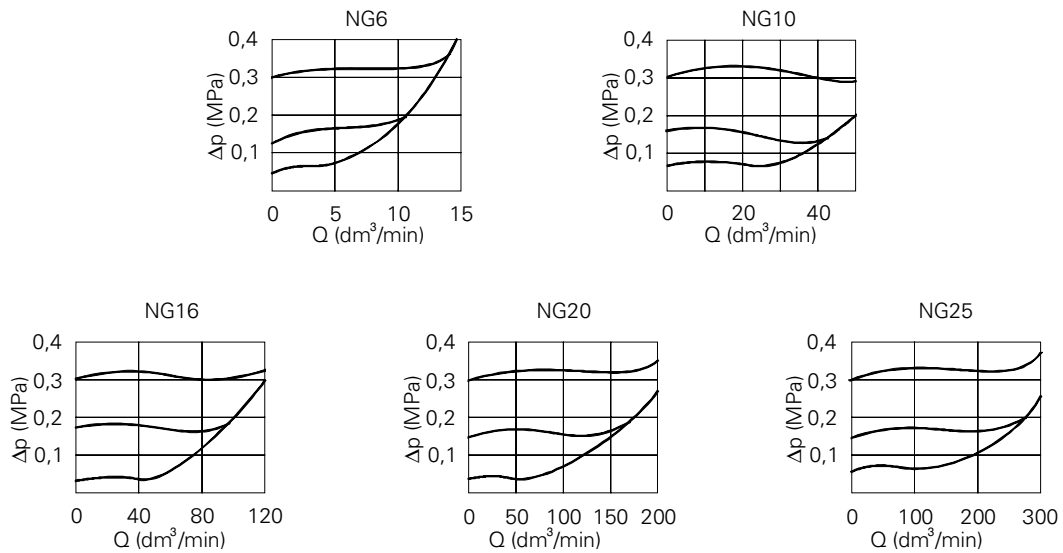

Hydraulic fluid	Mineral oil or phosphate ester				
Filtration	≤ 16 μm				
Maximum working pressure	32 MPa				
Nominal fluid viscosity	37 mm ² /s at the temperature of 328 K				
Viscosity range	2.8 to 380 mm ² /s				
Optimum working temperature (fluid in a tank)	313 - 328 K				
Temperature range	243 - 343 K
