

# CHECK VALVE TYPE WZZC 06 SANDWICH PLATE

**WK  
450 355**

Size 06

up to 32 MPa

20 dm<sup>3</sup>/min

04.2000r.

Check valves of sandwich plate design are intended for mating with control valves. They allow free flow of fluid in one direction and self-acting closure in the opposite direction. Valves can be mounted in any position as an intermediate element between a subplate and a control valve.

## DESCRIPTION OF OPERATION

The sleeve 3 with the seat for the spring 4 is fitted in the housing 1. The spring pushes the poppet 2 to the edge of port P in the housing 1. When pressure difference in port P exceeds the cracking pressure determined by the spring, the poppet will move allowing free flow in line P. Ports A, B, T serve as flow passages.

## TECHNICAL DATA

Hydraulic fluid	Mineral oil or phosphate ester
Nominal fluid viscosity	37 mm <sup>2</sup> /s at the temperature of 328 K
Viscosity range	2.8 to 380 mm <sup>2</sup> /s
Optimum working temperature (fluid in a tank)	313 - 328 K
Fluid temperature range	243 - 343 K
Required fluid filtration	16 μm
Recommended fluid filtration	10 μm
Maximum working pressure	32 MPa
Cracking pressure	0.05 MPa
Weight	0.6 kg

# OVERALL DIMENSIONS

item 1 - o-ring 9.2 × 1.8 - 4 pieces

Admissible surface roughness and flatness deviation for a subplate face.

# PERFORMANCE CURVES, measured at $v = 41 \text{ mm}^2/\text{s}$ and $T = 323 \text{ K}$

## HOW TO ORDER

Orders coded in the way showed below should be forwarded to the manufacturer.

**WZZC 06** - / \*

Series number :  
 20 = 20  
 (20 - 29) - installation and connection  
 dimensions unchanged

Additional requirements in clear text  
 ( to be agreed with the manufacturer )

Sealing  
 Fluids on mineral oil base = no designation  
 Fluids on phosphate ester base = V

Coding example : WZZC 06 - 20
